 **the projects company**
office interior specialists

FiXT is a modular range of wall and floor fixed legs commonly used by FF&E designers and contractors incorporating worktop depth and height adjustment as standard. Add to this a range of modular accessories **FiXT** allows you to build perimeter, peninsula & island bench units commonly found in educational, scientific, healthcare and research environments.

Such is the flexibility of **FiXT** it can allow for rapid deployment to site and should the conditions present a challenge on arrival its in-built adjustability can mean the difference between sticking to the installation schedule and costly re-visits and over-runs.
