People work everywhere!

The Projects Company create inspirational workplaces;
where people can perform at their best - individually and collectively.

Bench & Desk Systems

Evolv bench with slim line steel pedestals & Exo task chairs

Evolv

The Evolv system offers an extremely versatile desk solution, in either a single or bench style format.

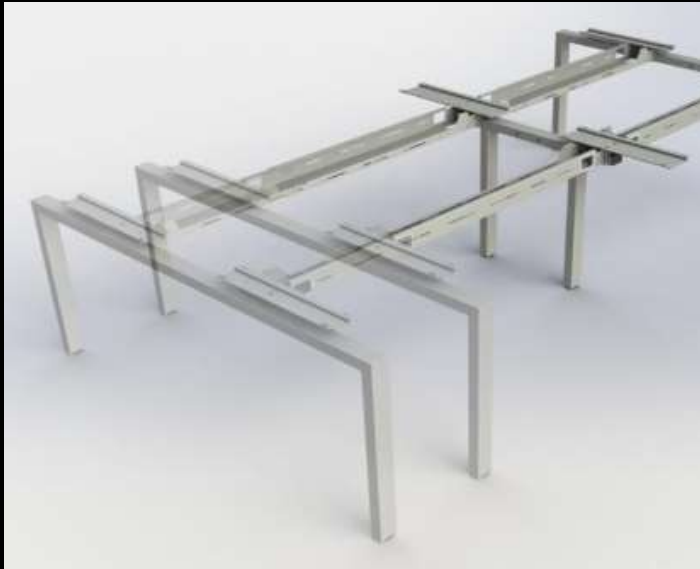

With multiple-depth worktop options and cable access solutions, Evolv offers everything that a high-density, open plan work station based office environment requires.

Evolv is built using an engineered telescopic frame, that allows for future changes in desk widths, without the cost of having to change the whole product. Just simply change worktops!

Used in conjunction with Division screens, Universal pedestals and Task seating collections, Evolv provides a beautiful workstation designed with flexibility & churn in mind.

Bench desk solutions

Telescopic beam

High capacity central cable riser & cable trays

Height adjustable insert kits – height settable, crank adjustable or powered as shown here.

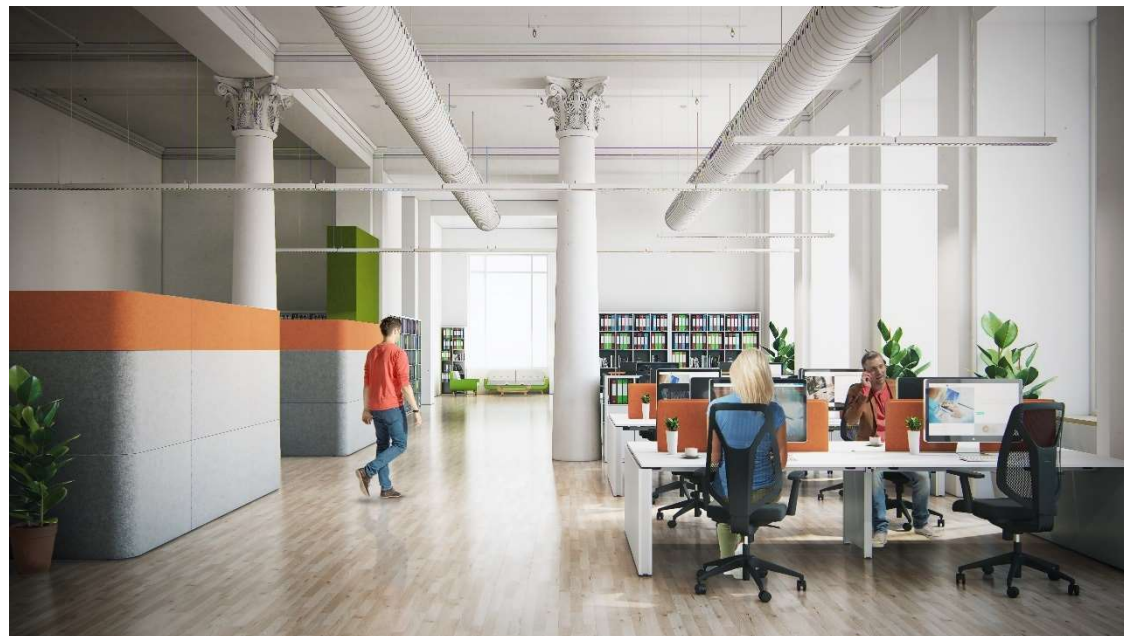

Delta configuration

Evolv with Ether Mesh task chairs

Evolv can be specified with simple corner legs or enhanced with the unique clad panel accessory. Panels can co ordinate or contrast with the work surface & simply attach to the standard corner leg with no visible fixings.

The flexible bench underframe includes telescopic beams, cable trays & risers. The tops can be specified fixed or sliding to access the high capacity cable trays. Screens attach directly to the bench frame providing robust metal to metal fixing.

MyStorage Executive work station

Evolv MyStorage

The MyStorage desk system was designed as a contemporary, hybrid workstation, that could form multiple layouts and configurations. Single, 2 & 4 person work stations can be configured where clusters with integrated storage are required rather than linear bench runs.

MyStorage uses the same components as the Evolv bench so that products can be mixed on a floor plate yet have the same aesthetic.

The executive work station also follows the same aesthetic & has been designed with cellular , managers offices, in mind.

Workstation with personal storage

MyStorage with seat pads & Exo mesh task chairs

Evolv Touch

With the drive of business to maximise the efficiency of the commercial office floor plate the Touch product was conceived. It's aim is to maximise the footprint of a bench desk configuration, whilst offering integral personal storage, all within the same floor space. By placing the locker element within the dimensions of the bench footprint, the business will save floor space over a more traditional solution of separate lockers & desks.

Touch also offers the perfect 'hot-desk' solution, by placing more lockers than there are work spaces within a bench run. For example 4 work spaces with 8 lockers.

The lockers have a choice of MFC or acrylic doors, you can also create vibrant, decorative storage to enhance walkways, or when placing Touch against walls, simply replace a storage unit with an Evolv bench leg, saving cost.

Space efficient solutions

Touch with Ether Mesh task chairs

Essence bench with Lunar screens & Either mesh task chairs

Essence

Remember those projects where all you require is a continuous work surface, efficient cable management & a screen? No bells, no whistles just the essence of what a bench should be.

Well we have that product & it's called Essence.

Available as a single desk or linear bench, simple tubular legs & beams interlock to create a robust underframe. Work surfaces bolt directly to the frame & a flip down cable tray provides efficient cable management. The full screen ranges bolt directly to the under frame – simple.

When all you require is a simple cost effective bench, Essence bench is a great solution.

Simple cost effective bench solution

SitStand desk

SitStand

The average office worker will sit for 5 hours & 41 minutes each day, the SitStand product range is designed to encourage posture change & help increase focus, alertness & activity levels by promoting movement.

Our SitStand desk and bench systems, offer easy to use, manual or electric powered height adjustable workstations. Using European manufactured sit-stand actuators the electric version complies with the most stringent range of height requirements in the world.

The control software includes Peizo anti – collision technology that reacts to obstructions when raising or lowering the work surface.

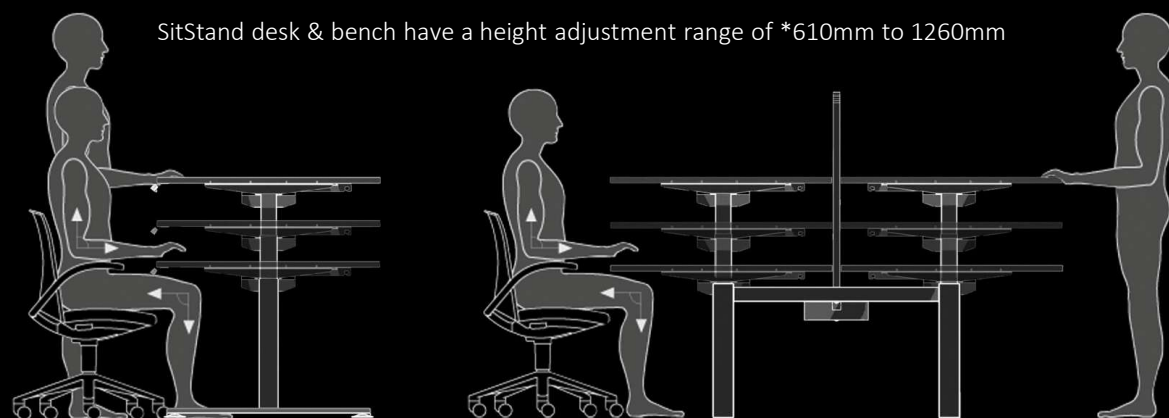

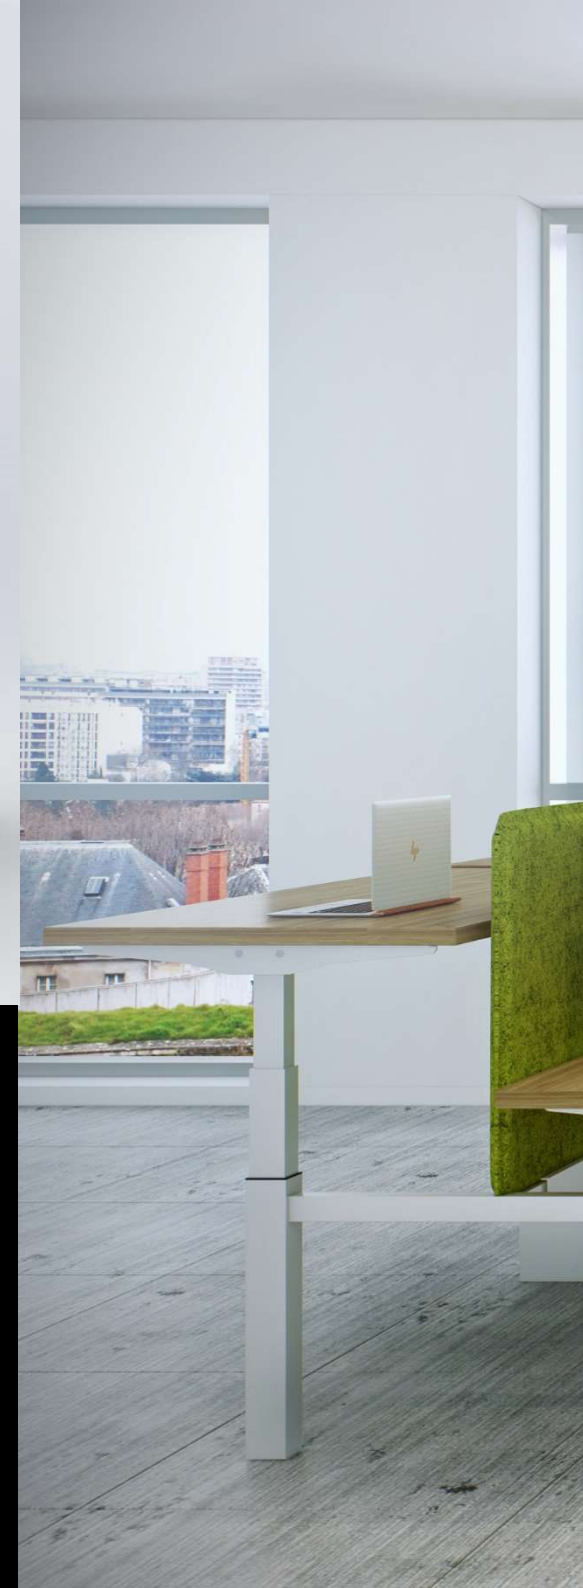

Height adjustable solutions

Kurv seating

SitStand desk

SitStand desk & bench have a height adjustment range of *610mm to 1260mm

**Electric height adjustable only*

SitStand bench with Exo task chairs

SitStand desk is available with a chrome foot & in an executive desk option. The executive desk has an integrated sliding door storage return with CPU bay & fixed glass shelf. Shown here with the Flame Executive task & meeting chairs.

Space Division

Think Tank

Is a Free standing cellular solution & does not require connection to the ceiling of the building. This key feature allows the pod to be Relocated to any new position in the existing or new building. The construction allows all material can be used again for the relocation.

Think Tank is specified as Furniture & therefore has tax benefits with the product written down.

The integrated Air Flow System creates a controlled environment without the need to reconfigure the buildings M & E services & as it doesn't connect to the building envelope there are no dilapidation costs.

Collaborative and personal zones

Think Tank with integrated seating & media module

Think Tank panels can be specified in a wide range of finishes – fabric, timber, steel, glazed.

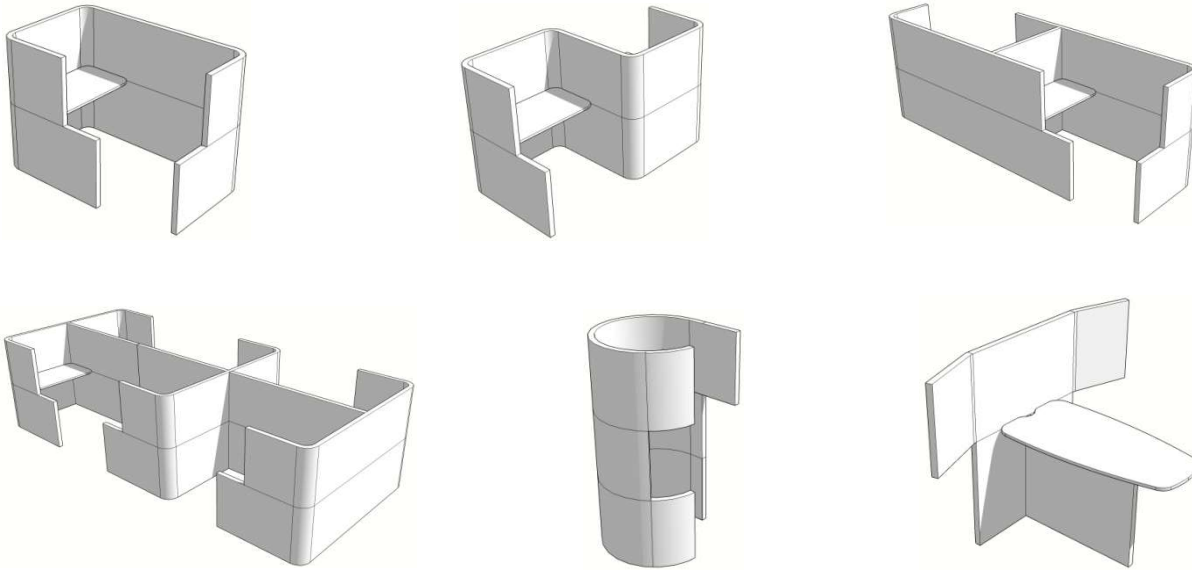

Glass Think Tanks as meeting & personal spaces

Think Tank sitting under a bulk head with graphic image applied to steel panels

Calm

The flexibility designed into the Calm product range allows collaborative & solo areas to be created, these can be specified to work with integral or free standing furniture resulting in users having access to their optimal environment for working.

‘Quiet booths’ for confidential or work-focused conversations are needed more than ever in the modern workplace, whilst agile, sound-absorbent meeting zones can replace traditional formal meeting spaces.

From free standing presentation tables & phone booths to low level informal collaborative spaces & onto high level pods with integrated ceiling & lighting, the flexibility of Calm will create the right solution.

Collaborative and personal zones

Calm meeting zones - with Kurv & low level Privo, coffee & poseur tables

Calm alcove with Kurv chairs & table, timber legs. Temp poseur height table with Elements stools.

Calm's myriad of options will create alcoves for printers, copiers & storage, informal meeting zones, sit & stand presentation zones, touch down booths & meeting pods.

Tables

Involv

Involv table frames are available with timber or metal legs. Timber legs are solid oak, the metal leg extends the finishes further with chrome or white options. The modular underframe allows 1,2,3 & 4 piece tops that can be built into tables up to 7200mm long x 1400mm wide.

We have our standard square edge detail along with a chamfered edge on an MDF substrate. There are 7 standard melamine finishes but we will look at other project lead finishes upon request. We have experience of supplying alternative MFC finishes, laminates such as Fenix, compact laminate, birch ply, birch ply with laminate face, birch ply with lino face & veneers.

Modular Table System

Storage

Lockit

Our lockers offer a stylish way to create personal storage hubs, whilst also providing the perfect surfaces to add vibrant colours & graphic images within a workplace.

Made using robust timber carcasses and a choice of either acrylic or timber doors, plus a host of lock options, our lockers can be manufactured to suit your dimensions* and are perfectly adapted to enhance your workplace.

**Subject to availability*

Personal storage solutions

Configure lockers to define circulation space & combine with Privo to create locker laybys

Lockers with flyover top creating a touch down space

Lockers wrapped around Privo creating informal meeting spaces

By combining lockers with our other products, why not create great spaces to store, meet and work in.....

Seating

Either Task Chair

Exo Task Chair

Exo Mesh Task Chair

Evo Soft Touch Task Chair

Seating

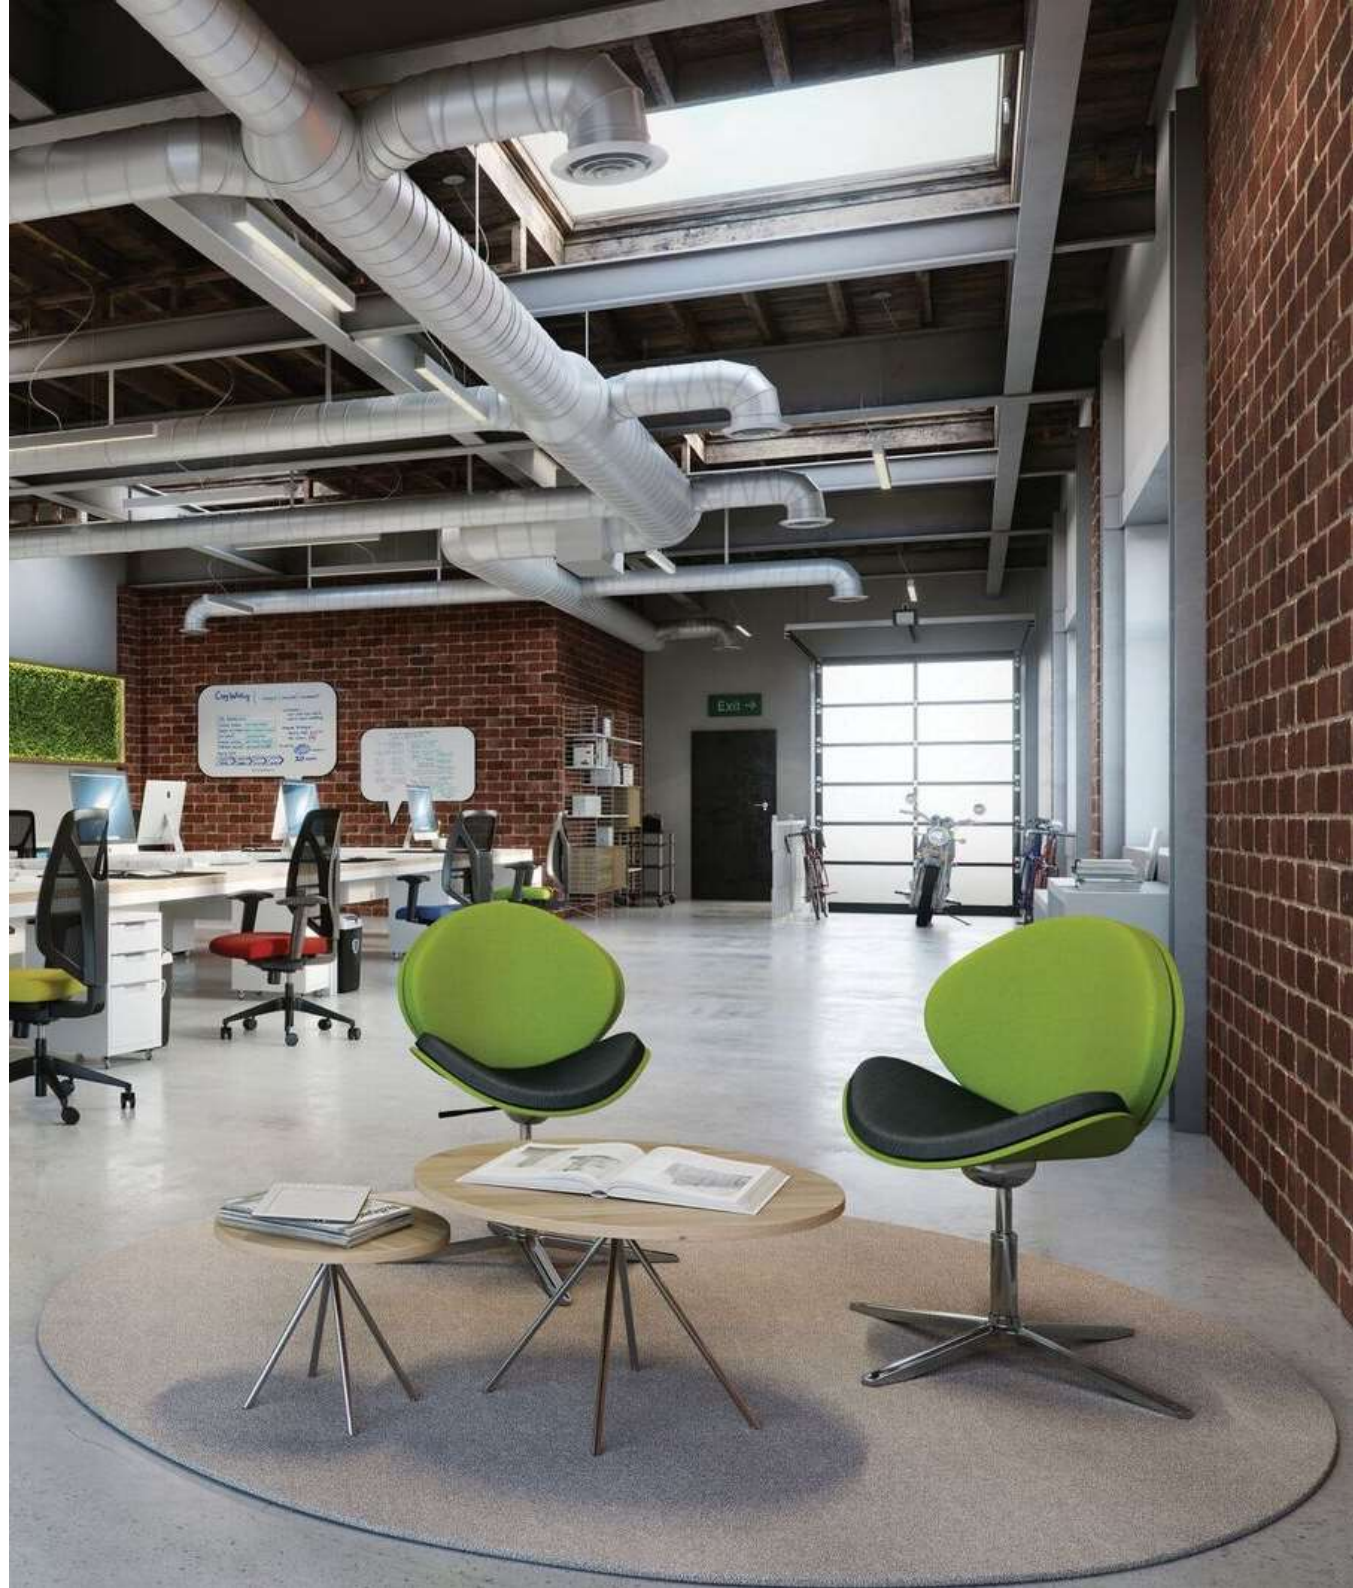

We offer an extensive range of seating. Whether its task chairs for workstations or softer products for meeting rooms and lounge areas, our products are designed to enhance your space.

A wide selection of fabrics and leathers compliment the range, along with options such as wood and polished metal.

Tile Square Back Chair

Tile Round Back Chair

Tarranto Chair & Sofa

Sphere Chair

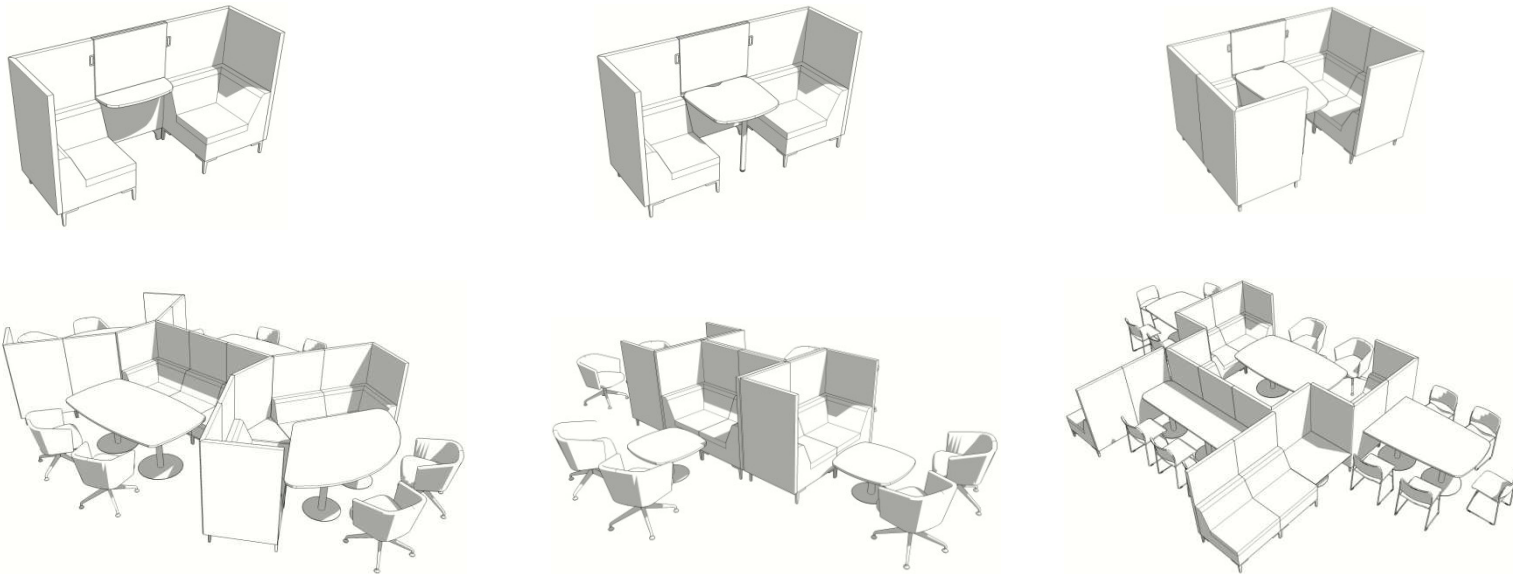

You lounge chair & sofa

Privo sofas with timber feet, Regatta credenza & Privo T tables

Privo

Privo is a programme of soft seating with integrated work surfaces, it is designed to create open & closed meeting spaces.

It can be used in conjunction with other products, such as freestanding tables, lockers and meeting chairs to transform a workspace into a colourful hive of activity and vibrant office landscape.

As the world of work & technology changes, so does the workplace. It is vital for businesses to discover the most effective use of space & support a wide range of creative, knowledge sharing & collaborative work styles. No longer tied to space hungry formal meeting rooms, Privo offers a host of options, whether you are looking for a casual touchdown zone, a meeting space or a group of secluded alcoves.
